WHY AIM?

OUR FOUNDATION

The AIM Institute was founded by renowned Plastics Hall-of-Famer John Beaumont who has dedicated his life to bettering our industry. John also invented MeltFlipper®, is the President of Beaumont, and founded and chaired Penn State's Plastics Engineering & Technology program.

OUR INSTRUCTORS

AIM's team of instructors includes some of the most brilliant minds in our industry. Combined, they have acquired over 220 years of plastics industry experience.

"AIM has extremely knowledgeable instructors. Some of the most brilliant minds I have encountered in 20 years in injection molding. The knowledge I have gained is invaluable."

-Chad Johnson, Sr. Process Engineer, Phillips-Medisize

OUR RESEARCH-BASED MODEL

Every program offered at AIM is based on the latest research available, much of which is conducted within our own walls. We work very closely with our customers, including those of our parent company Beaumont Technologies, to understand the industry's knowledge gaps and develop educational content that fills those needs.

OUR VARIETY OF COURSES

ONLINE TRAINING NOW AVAILABLE!

AIM has courses for novices through experienced professionals from all industry backgrounds.

PTE PROGRAM

Accredited, comprehensive plastics education for industry professionals

MOLDERS' SERIES

Accredited, hands-on training for processors

DEVELOPMENT COURSES

Subject-specific seminar courses

AUTODESK® MOLDFLOW®

Moldflow® courses for users of all levels

MOLD MAINTENANCE

A variety of maintenance courses providing education on specific topics

American Injection Molding Institute
